Power source:	interchangable (CR2)
Field of view:	160 m
Weight:	1000 g
Length:	160 mm
Exit pupil:	5,00 mm
Measuring range:	10-1600 m
Transmission rate:	90

DESCRIPTION

GECO binoculars offer the perfect entry point into the world of high-end observation optics at unbeatable value for money. The slim and ergonomic design is combined with high-quality materials. The entire housing is made of magnesium. They deliver a large field of view, sharp edge definition, high transmission values and a great short focus thanks to ED glass, multilayer coating and an adjusted optic calculation. These models stand out from their competitors due to their robustness, light weight and optical performance.
