WELCOME TO THE WORLD OF GECO!

Innovative developments and growth have shaped the GECO brand since its foundation in 1887:

Originally a weapons and ammunition wholesaler, GECO quickly developed into a flourishing company.

With more than 130 years of experience and expertise, GECO today offers a modern and wide range of products for hunters and sport shooters worldwide. The assortment ranges from ammunition through optics to selected equipment and covers all applications in hunting and sports. The maxim: high quality standards combined with an attractive value for money.

Over time, in addition to the range, the brand image and the brand perception have continued to develop. The aim of the revision of the brand identity in 2021 is to express the passion of the users more clearly - whether for hunting or sport shooting. The fresh, dynamic new look from GECO underlines the identity of the brand even more clearly.

Our patron Genschow would probably be proud – and rightly so. His guiding principle of “quality products in the service of hunting and sport” remains firmly embedded in the **GECO brand DNA**. Or, as we put it:

WHERE EXCITEMENT STARTS.

MORE THAN A LOGO

A QUALITY SEAL

As part of the brand refresh, one of its most striking recognition elements, the **GECO logo**, has been given a new look that expresses the **dynamics and enthusiasm** for the endeavour in style. Since GECO was founded, great importance has been attached to a **coherent brand presence** and the logo has always been perfected as part of a holistic image.

WHERE EXCITEMENT STARTS

The brand presents itself in a modern and contemporary way, on the one hand to underline its unique and unmistakable qualities, and on the other hand to continue to meet the Zeitgeist of modern hunters and sport shooters.

The feeling of tension or suspense in any form – from boundless anticipation to maximum concentration –

is expressed with the new claim "Where Excitement Starts". This is especially true when it comes to active hunting and sport shooting. The shape and components of the new logo visualise precisely this high-stakes feeling of anticipation, excitement, concentration and performance that make the worlds of hunting and sport shooting so special.

NEW LOOK! NEW PACKAGING!

GECO now comes in a new guise.

In order to enable hunters and sport shooters to quickly identify what they are looking for, the packaging has been given a new colour palette. Ammunition packaging for hunting will be in red, while packaging for the sports segment will be black. Optics products, on the other hand, will in future come in white packaging.

NEW LOOK!

NEW: LABELS ON ALL HUNTING AMMUNITION PACKAGING

A small but useful aid is now available to GECO hunting fans.

The new labels include important information on the ballistic data of the respective products and provide an optimal overview for successful deployment.

HUNTING

GECO has five different bullet lines for quality and price-conscious hunters to ensure they can select the ideal and most suitable rounds. The compelling names of the bullet lines not only have recognition value, but also offer orientation and provide transparency regarding their application.

GECO PLUS is ideally suited for shooting strong game. **GECO EXPRESS** ensures hits over long distances. **GECO SOFTPOINT** is a real all-rounder and can be used universally for all types of game.

GECO ZERO is lead-free and delivers an incredibly powerful knock-down effect. **GECO STAR** is lead-free and is also designed to achieve maximum penetration. GECO thus opens the doors to the world of hunting and guarantees the best possible hunting experience.

Impressive accuracy and balanced terminal ballistic performance are inherent features of the brand, as are ensuring the highest levels of quality and providing reliable solutions.

GECO – WHERE EXCITEMENT STARTS.

NEW CENTREFIRE RIFLE CARTRIDGES HUNTING

STAR

NEW 2021: New addition to the product line in the calibres 7 x 64, 8 x 57 JS and 8 x 57 JRS

STAR represents the latest development in GECO's range of hunting bullets. The lead-free deformation bullet promises maximum penetration and a high residual weight.

Due to the hollow point, the new STAR bullet reliably deforms at nearly any hunting distance. Its excellent inherent precision can be attributed to the integrated performance grooves.

GECO STAR is the optimum bullet for all hunters who hunt with lead-free bullets and want to minimise damage to the venison.

EXPRESS

NEW 2021: New additions to the product line in the calibres 6.5 Creedmoor and 6.5 x 55 SE

GECO EXPRESS is characterised by its flat trajectory, high projectile velocity and an especially high instantaneous effectiveness. The noticeably streamlined shape of the bullet with GECO EXPRESS tip allows more accurate shots at long range without point-of-aim correction.

The jacket construction enables high projectile speeds that are held right up to the target and converted into energy upon impact. Energy that stops the targets reliably.

CENTREFIRE RIFLE CARTRIDGES HUNTING

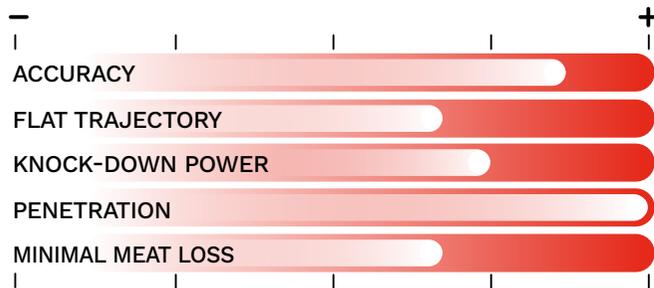

GECO STAR – The lead-free deformation bullet promises maximum penetration and a high residual weight.

- GECO HOLLOW POINT:**
For reliable deformation at all distances
- GECO GROOVES:**
For maximum precision and optimum ballistics
- GECO COPPER CORE:**
For deep penetration and high knock-down power

PERFORMANCE

STAR

THE DYNAMIC HUNTING BULLET

NEW 2021: New addition to the product line in the calibre 7x64

STAR represents the latest development in GECO's range of hunting bullets. Due to the hollow point, the new STAR bullet reliably deforms at nearly any hunting distance. Its excellent inherent precision can be attributed to the integrated performance grooves.

This makes GECO STAR the perfect bullet for anyone who values lead-free bullets and who wants to minimise damage to the venison.

CENTREFIRE RIFLE CARTRIDGES HUNTING

ZERO

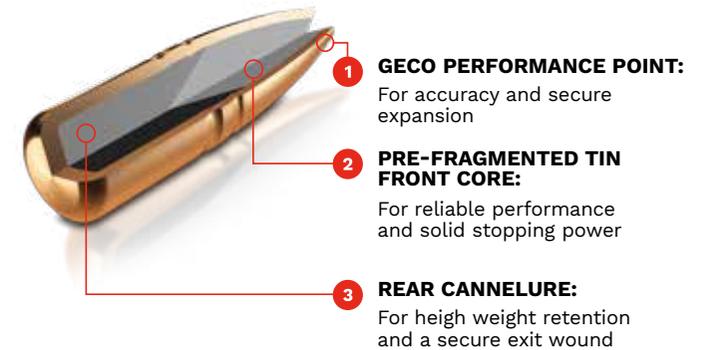

THE CLEVER HUNTING BULLET

The partially fragmenting bullet GECO ZERO distinguishes itself from the competition with its superior precision and high instantaneous effectiveness, all the while eschewing lead and without compromising on quality. This highly innovative jacketed bullet has two tin cores. Supported by the hollow point construction, the pre-fragmented front core disintegrates immediately when it hits the body of the game and releases a large part of the energy that quickly stops the target reliably. The rear tin core, together with the jacket forms the rest of the bullet's stable body and allows for deep penetration and a secure exit wound.

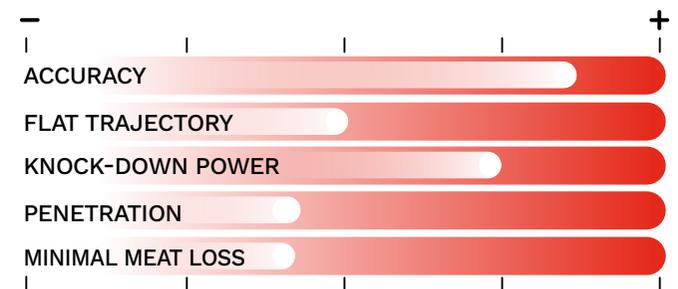

All this makes GECO ZERO an excellent choice.

GECO ZERO – The highly effective and accurate lead-free bullet. For all types of game.

PERFORMANCE

CENTREFIRE RIFLE CARTRIDGES HUNTING

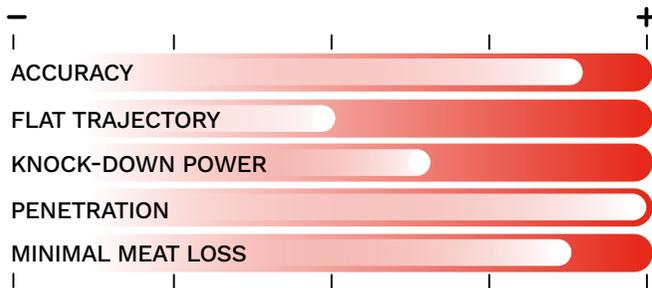

GECO PLUS – Penetrates deeply and preserves even larger game.

- 1 GECO PERFORMANCE POINT:**
For precision and safe deformation
- 2 GECO GROOVES:**
For controlled effectiveness
- 3 GECO BONDING:**
For deep penetration and venison protection

PERFORMANCE

PLUS

THE POWERFUL HUNTING BULLET

GECO PLUS boasts state-of-the-art, precise bullet technology. GECO's bonding technology is characterised by an extremely solid bond between the core and the jacket of the bullet. GECO PLUS loses almost none of its parts when mushrooming and is able to reliably penetrate even large game and bones. The strong bond between the lead core and jacket ensures that the venison remains clean, as almost no residue remains.

Deformation is guided by the predetermined breaking points visible on the outside of the jacket and is what gives the bullet its effectiveness.

EXPRESS

THE FAST HUNTING BULLET

NEW 2021: New additions to the product line in the calibres 6.5 Creedmoor and 6.5x55 SE

GECO EXPRESS is characterised by its flat trajectory, high projectile velocity and an especially high instantaneous effectiveness. The noticeably streamlined shape of the bullet with GECO EXPRESS tip allows more accurate shots at long distances without point-of-aim correction.

The jacket construction enables high projectile speeds that are held right up to the target and converted into energy upon impact.

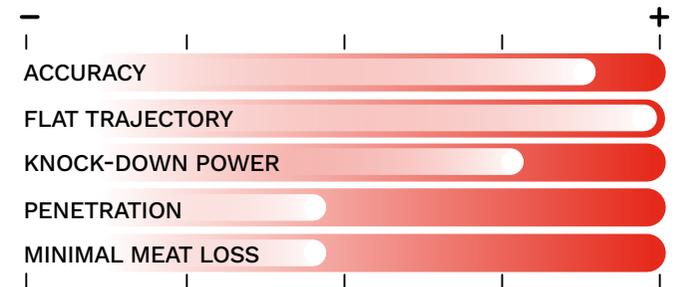

Energy that stops the targets reliably.

GECO EXPRESS – Suited to any hunting scenario that demands accuracy and efficacy at long range.

PERFORMANCE

CENTREFIRE RIFLE CARTRIDGES HUNTING

GECO SOFTPOINT – Universally applicable and able to cope with almost any hunting situation.

- 1 GECO CLASSIC TIP:**
For safe deformation and stability
- 2 GECO LEAD CORE:**
For a well-balanced performance
- 3 GECO TS JACKET:**
For precision and barrel protection

PERFORMANCE

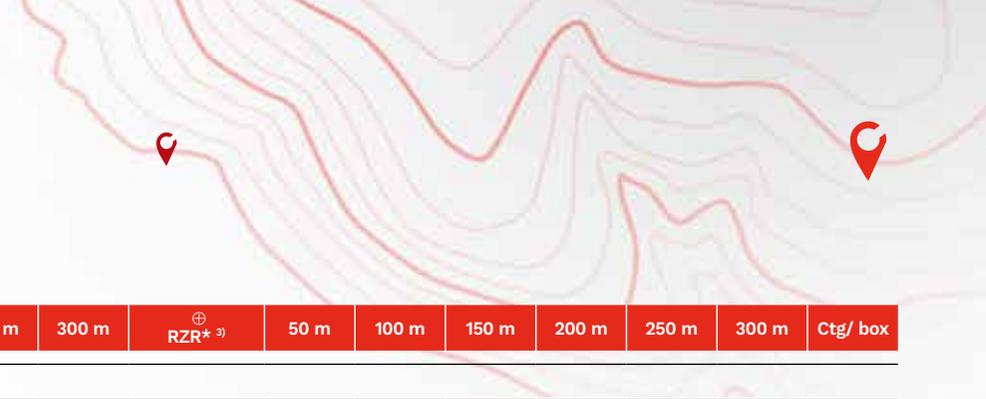

SOFTPOINT

THE CLASSIC HUNTING BULLET

GECO SOFTPOINT is a bullet with an universal range of use that is able to cope with the demands of almost any hunting situation. It can be relied on to respond appropriately in the game and produce a good terminal ballistic performance. The thin-walled bullet jacket is the secret to its successful design. Deformation begins from its pronounced lead tip, and the jacket adapts to the target resistance.

CENTREFIRE RIFLE CARTRIDGES
SPORT SHOOTING

CENTREFIRE RIFLE CARTRIDGES

SPORT SHOOTING

GECO offers a full portfolio for active and modern sport shooters. GECO SPORT is specially designed for the shooting range and match situations. The balanced load creates a particularly pleasant shooting experience. Success and accuracy are guaranteed even at long distances. The nickel-plated bullet jacket ensures constant muzzle velocities.

The new **GECO TARGET HP** product line guarantees outstanding accuracy. Its products are reliable companions when shooting at long range and ideal for competitions and practice sessions alike. **GECO TARGET FMJ** – particularly suitable for intensive and continuous practice and for use with semi-automatic weapons with a high rate of fire. For guaranteed precision. Ideal for IPSC shooters. Shooting at an affordable price for constant self-improvement. The **GECO DTX** line was designed specifically to meet the needs of shooters who use a lot of ammunition: the balanced value for money of the GECO DTX offers the proven GECO quality in a balanced training cartridge.

NEW

CENTREFIRE RIFLE CARTRIDGES SPORT SHOOTING

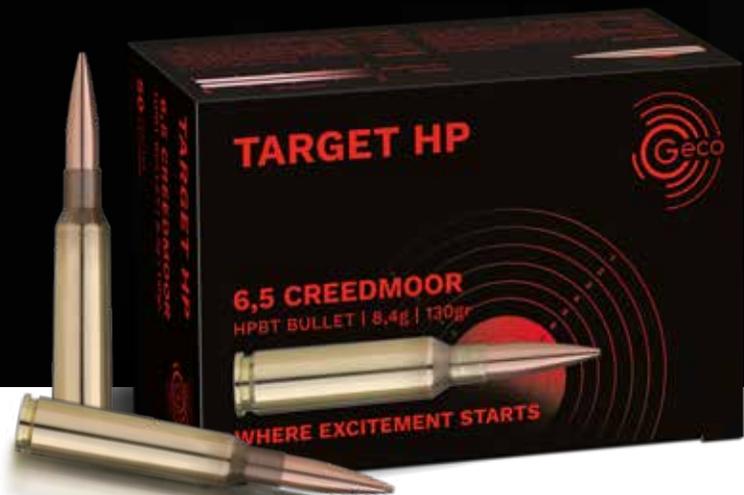

TARGET HP

THE LONG RANGE SHOOTING BULLET

NEW 2021: New additions for competition and training
in the calibres 6.5 Creedmoor and 6.5x55 SE

The new GECO TARGET HP rounds have been specially developed for the shooting range and competitions. Its well-balanced load makes the TARGET HP particularly pleasant to shoot. The precisely manufactured hollow-point bullet guarantees outstanding accuracy even at long distances. What's more, the convenient box of 50 offers very good value for money, ideal for regular training at the shooting range.

PERFORMANCE

TARGET HP

THE LONG RANGE SHOOTING BULLET

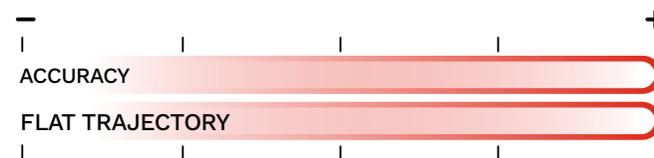

NEW 2021: New additions for competition and training in the calibres 6.5 Creedmoor and 6.5x55 SE

GECO TARGET HP – Ideally suited to competitions and the shooting range. GECO TARGET HP's balanced load allows for a particularly comfortable shooting experience. One of the factors responsible for this is the precisely manufactured hollow-point bullet, which guarantees outstanding accuracy even at long distances.

The convenient box of 50 TARGET HP offers a very good value for money – ideal for regular training on the shooting range.

PERFORMANCE

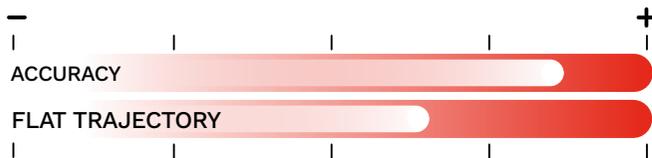

CENTREFIRE RIFLE CARTRIDGES SPORT SHOOTING

GECO TARGET FMJ is particularly suitable for use with semi-automatic weapons with a high rate of fire. They also guarantee maximum precision, a factor that is appreciated by IPSC shooters in particular.

Offering good value for money, the GECO TARGET FMJ line is particularly well-suited to shooters with high training intensities. The FMJ bullet's tombac jacket reduces fouling of the barrel, thereby significantly reducing cleaning intervals and leaving nothing standing in the way of success.

PERFORMANCE

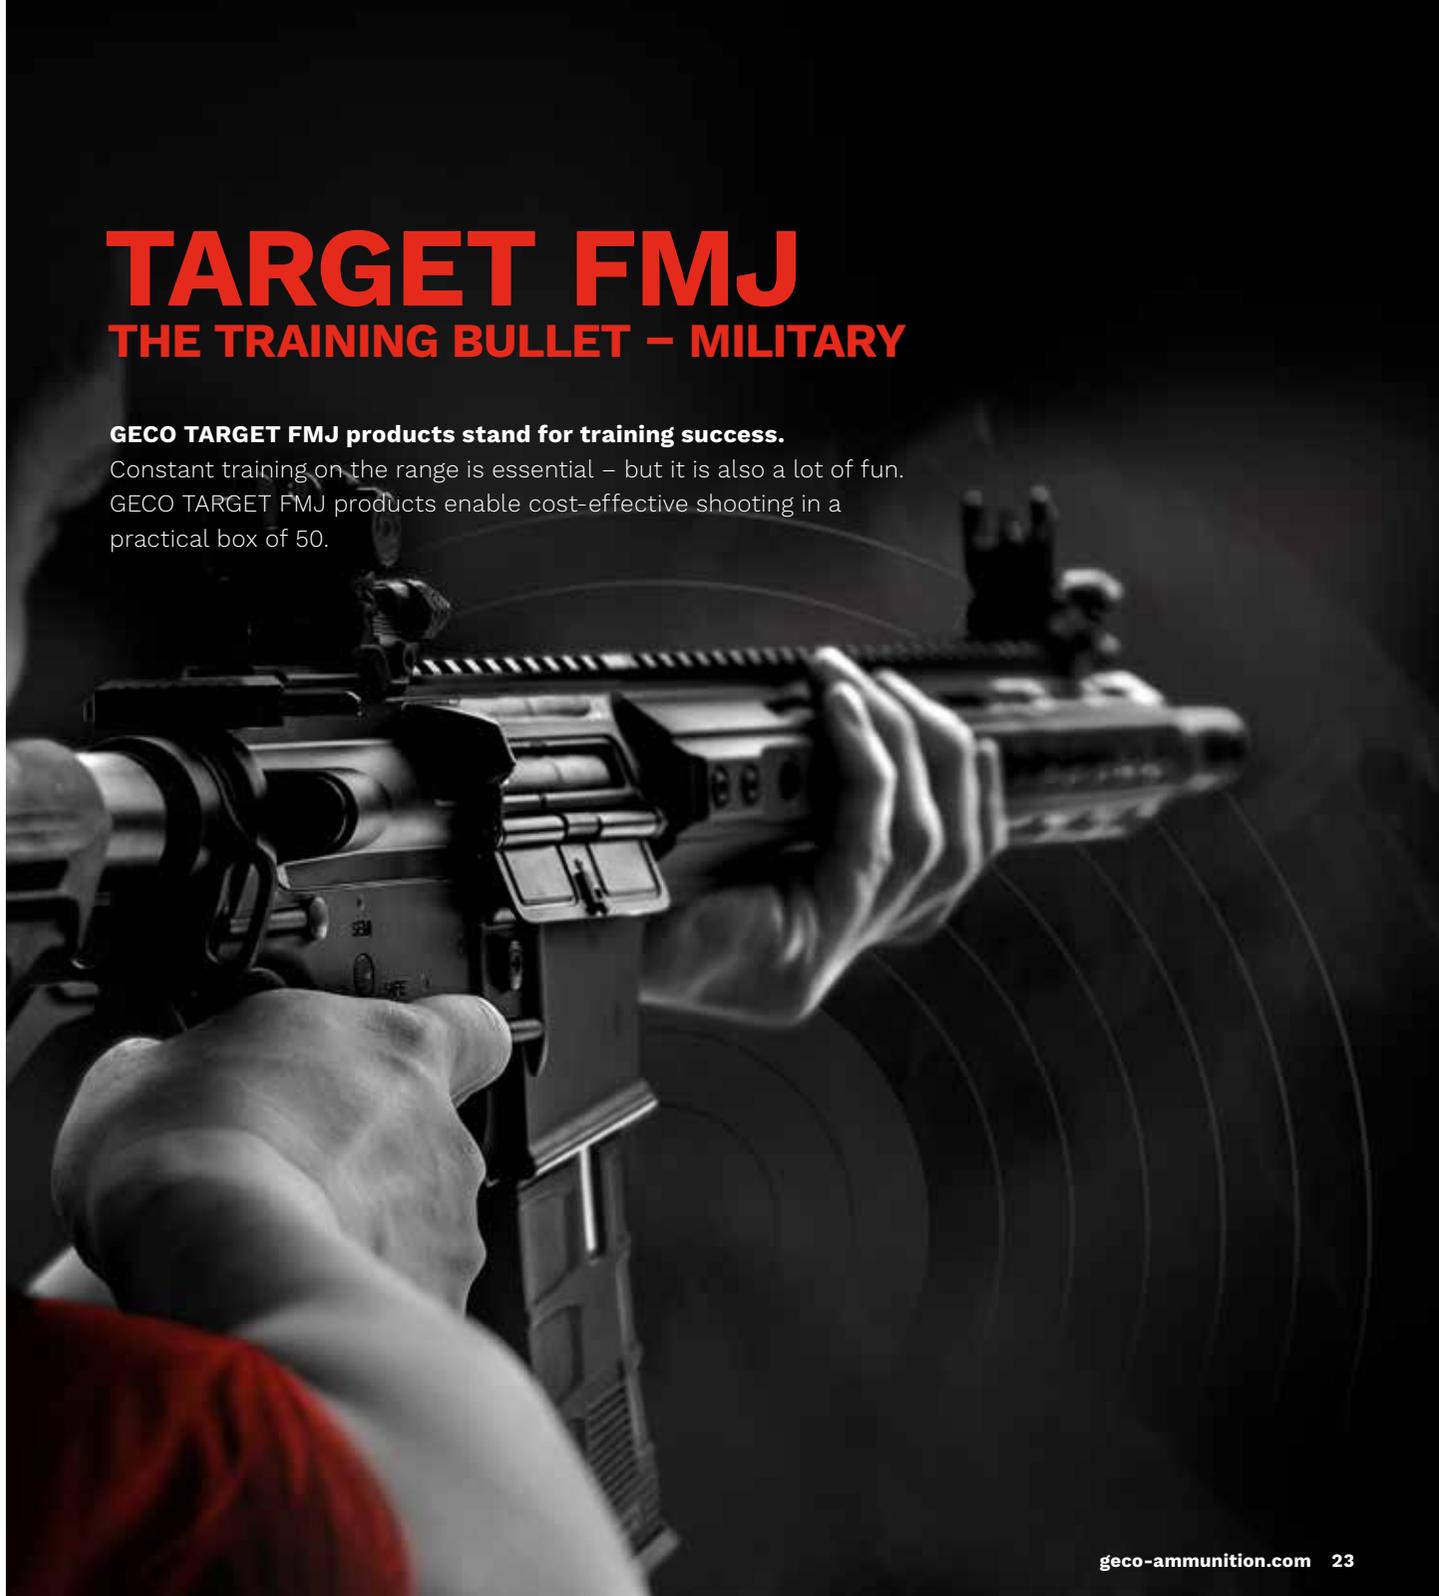

TARGET FMJ

THE TRAINING BULLET – MILITARY

GECO TARGET FMJ products stand for training success.

Constant training on the range is essential – but it is also a lot of fun. GECO TARGET FMJ products enable cost-effective shooting in a practical box of 50.

SPORT

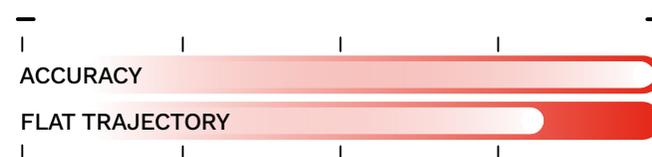

THE MATCH BULLET

Better shooting through regular training: GECO SPORT is specially designed for the shooting range and competitions. Its well-balanced load makes the GECO SPORT particularly pleasant to shoot. The precisely manufactured hollow-point bullet guarantees outstanding accuracy even at long distances.

The nickel-plated bullet jacket reduces abrasion in the barrel and ensures constant muzzle velocities. This coating also minimises the build-up of heat in the barrel and reduces the need for cleaning.

The intelligent pack of 50 rounds represents a good value for money, leaving nothing standing in the way of regular practice.

PERFORMANCE

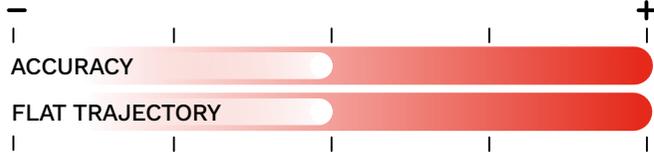

CENTREFIRE RIFLE CARTRIDGES SPORT SHOOTING

GECO DTX's great value for money in the popular calibres .223 Rem. and .308 Win. makes it a well-balanced practice cartridge – of course in proven GECO quality.

GECO DTX is designed for shooters who use a lot of ammunition and is particularly suitable for simple training.

PERFORMANCE

DTX

THE PERFECT TRAINING BULLET

The GECO DTX line was built specifically for the needs of shooters who use a lot of ammunition.

PISTOLS & REVOLVERS

The range of GECO handgun cartridges has been continuously expanded and consistently tailored to meet the needs of shooters.

For static shooting, dynamic shooting, hunting and self-defence, a diverse portfolio of cartridges is now available. With 13 calibres and 10 different types of bullets, GECO's range of handgun cartridges can always provide you with the perfect product for every individual use case.

STATIC TARGET SHOOTING

HUNTING

DYNAMIC SHOOTING

SELF-DEFENCE

NEW HANDGUN CARTRIDGES

ACTION EXTREME

NEW 2021: New additions to the product line in the calibres .40 S&W and .45 Auto

Handgun ammunition with unparalleled stopping power.

The bullet mushrooms in a controlled manner and impresses with its outstanding expansion properties. The energy is transferred completely to the target and therefore guarantees superb stopping power. Shooters can always count on GECO ACTION EXTREME.

ACTION EXTREME FRAGMENTATION

NEW 2021: New product line (4 calibres) – 9 mm Browning short, 9 mm Luger, .40 S&W, .45 Auto

Handgun Ammunition with great penetration depth.

This hollow-point bullet fragments into five pieces, with the four petals quickly detaching from the core piece and spreading evenly. The residual body of this solid copper projectile achieves great penetration depth. Energy transfer from the five pieces is excellent.

HANDGUN AMMUNITION

REVOLVER & PISTOL BULLETS AT A GLANCE

ACTION EXTREME

The bullet mushrooms in a controlled manner and impresses with its outstanding expansion. The energy is transferred completely to the target and therefore guarantees superb stopping power. Shooters can count on GECO ACTION EXTREME.

ACTION EXTREME FRAGMENTATION

This hollow-point bullet fragments into five pieces, with the four petals quickly detaching from the core piece and spreading evenly. The residual body of this solid copper projectile achieves great penetration depth. The energy transfer from the five pieces is excellent.

The lead exposure in the immediate vicinity of the shooter and the range supervisor can be damaging to one's health. Due to the lead-free GreenFire primer technology that has already been used in NATO-approved ammunition for years, lead is no longer released into the air surrounding the shooter.

In addition, the bullet's rear encapsulation prevents lead particles from detaching when fired.

HEXAGON

Modelled on the hollow-point design, the HEXAGON bullet was built for absolute precision and without regard for its expansion properties. This non-expanding bullet thus combines the advantages of the HP design, such as the closed end, with optimal potential for accuracy.

FMJ/DTX

Due to its technically simple construction, the FMJ bullet is easy to manufacture. It is therefore extremely interesting for shooters with high training intensities.

JACKETED HOLLOW-POINT

The hollow-point bullet is the perfect choice if absolute precision is what you are after. That is why it has enjoyed the trust of top shooters from across the globe for many years now.

SOFTPOINT

The semi jacket bullet represents a compromise between the FMJ and the hollow-point bullet in terms of its design.

COPPER-PLATED LEAD ROUND NOSE

The reduced smoke production and minimal pollution load of the copper-plated variant round off the advantages of the LRN bullet.

ENCAPSULATED FMJ

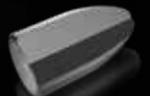

The encapsulated version emerged as a successor product to the conventional FMJ bullets. It is distinguished by a reduced pollution load and smoke production.

WAD CUTTER

Due to its shoulder-stabilised attitude in flight, the wad cutter bullet allows for outstanding accuracy even with low projectile velocities.

LEAD ROUND NOSE

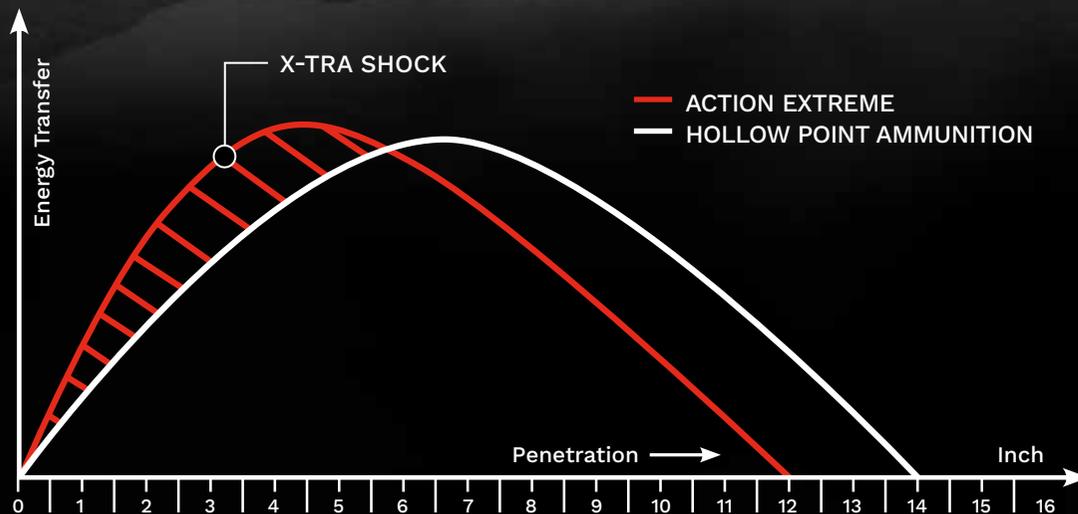

The traditional LRN bullet conforms well to the barrel profile and also results in very little wear on the barrel due to reduced friction.

HANDGUN CARTRIDGES

ACTION EXTREME

**EXCEPTIONAL MUSHROOMING,
IMPRESSIVE KNOCK DOWN EFFECT.**

V_0 : 360 m/s / 1181 fps. – E_0 : 454 Joule / 336 ftlbs – Test barrel length: 150 mm

ALL-PURPOSE ROUND

Hunting – self defence – personal protection

FUNCTION FIRST

Safe feeding into the chamber through the ogival form of the bullet. Improved ballistic performance due to streamlined projectile form. Closed bullet design prevents blockage of the breech.

FOR ALL BARREL LENGTHS

These new cartridges can be used in Full Size, Compact Size and Sub Compact Size pistols and achieve the same performance data in all models.

NEW 2021: New additions to the current product line in the calibres .40 S&W and .45 Auto

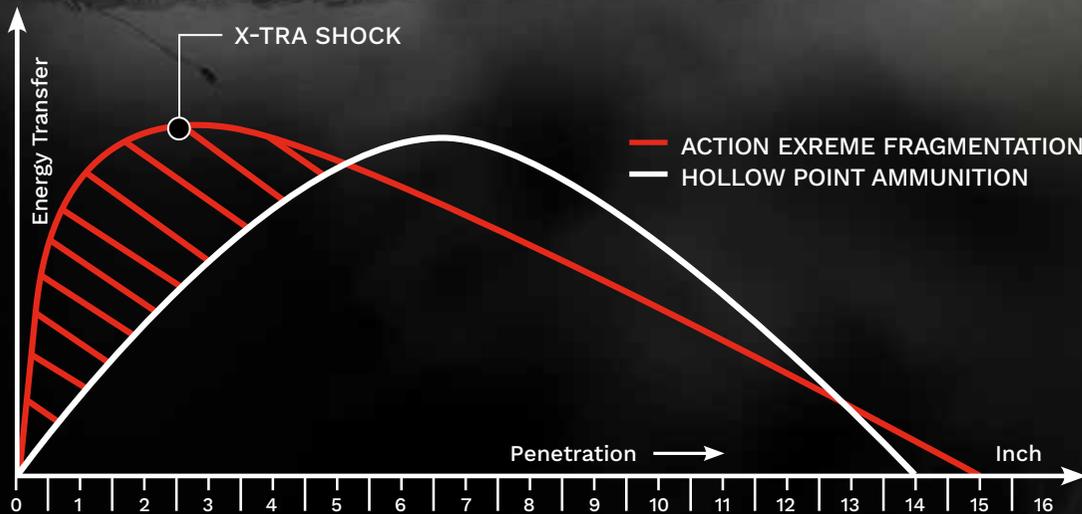

The monolithic, lead-free deformation bullets show controlled mushrooming and impress with extraordinary expansion. The energy is transferred completely to the target, resulting in excellent stopping power.

ACTION EXTREME FRAGMENTATION

**GREATER PENETRATION,
PROVEN STOPPING POWER.**

CLEAR BALLISTIC

V_0 : 360 m/s / 1181 fps. – E_0 : 454 Joule / 336 ftlbs – Test barrel length: 150 mm

ALL-PURPOSE ROUND

Hunting – self defence – personal protection

FUNCTION FIRST

Safe feeding into the chamber through the ogival form of the bullet. Improved ballistic performance due to streamlined projectile form. Closed bullet design prevents blockage of the breech.

FOR ALL BARREL LENGTHS

These new cartridges can be used in Full Size, Compact Size and Sub Compact Size pistols and achieve the same performance data in all models.

NEW 2021: New product line in the calibres 9 mm Browning short, 9 mm Luger, .40 S&W, .45 Auto

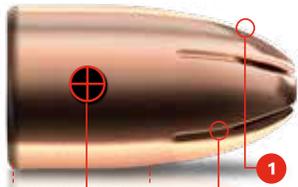

The monolithic, lead-free fragmentation bullets are engineered for all pistol users who prefer greater depth with proven stopping power across the entire velocity range.

HANDGUN CARTRIDGES

- 1 HIGH-ACCURACY CASING**
With even wall thickness and optimised concentricity.
- 2 HIGH-PERFORMANCE POWDER**
For consistent speed development and reduced burn-off temperature.
- 3 CLOSED PROJECTILE BASE**
For shooting without lead emissions.
- 4 NATO-APPROVED SINTOX PRIMERS**
For ignition free of heavy metals.

- 1 ADVANTAGEOUS AERODYNAMIC FORM**
The almost closed tip is aerodynamically advantageous, as it provides a longer trajectory with less reduction in velocity.
- 2 6 STABILISATION GROOVES**
The 6 long grooves create what is referred to as the golf ball effect. This means that the air vortex created by the rotation around the longitudinal axis provides additional stabilisation of the projectile in flight.
- 3 OPTIMISED CENTRE OF GRAVITY**
The centre of gravity of the bullet is shifted to the rear, contributing to the improvement of accuracy.
- 4 IMPROVED BARREL GUIDANCE**
The long, cylindrical projectile section achieves improved barrel guidance.

HEXAGON

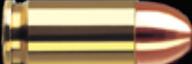

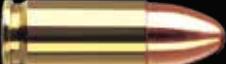

THE BENCHMARK FOR ACCURACY

The GECO HEXAGON in 9 mm Luger, .357 Magnum, .44 Rem. Mag. and .45 Auto are loaded with innovations. It combines state-of-the-art engineering with selected advantages of a hollow-point design and optimised accuracy.

The outcome: Innovative, high-performance precision cartridges for the most ambitious sporting demands.

SPECIAL CARTRIDGES

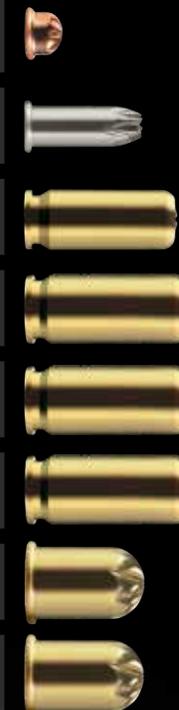

SUPER FLASH: Whether as a deterrent or just for fun, the GECO 9 mm P.A. Knall SUPER FLASH offers more than an ordinary blank cartridge: In addition to the loud bang, the SUPER FLASH generates an orange muzzle flash.

This firelight is bright and long-lasting, and therefore an impressive effect not only in the dark. The cartridge can be identified by the white cap.

RIMFIRE

Anyone looking for impressive, but still very inexpensive rimfire cartridges will find what they are looking for at GECO: The shooter can definitely rely on the absolute functionality, the consistent shooting behaviour, and the high precision. Whether RIFLE or SEMI-AUTO – GECO supplies solid ammunition that guarantees the necessary degree of accuracy, and all of that at an extremely affordable price.

GECO RIFLE: Reliable operation with self-loading weapons

GECO SEMI-AUTO: Optimised for semi-automatics and pistols

- Good performance at an affordable price
- Training and practice ammunition for ambitious beginners
- All-purpose cartridges for beginners

AIRGUN

The **GECO DIABOLO** was developed specifically with beginners and hobby shooters in mind.

Because those who like to shoot a lot need accurate airgun pellets at a low price.

The standardised processes in the manufacture of this smooth airgun pellet guarantee this.

The **GECO SUPERPOINT** is a smooth airgun pellet with a conical head shape that has a high penetration capability and depth. It is therefore suitable for target shooting as well as for hunting applications in pest control. An optimised weight distribution ensures good accuracy.

Item No.	Type	Calibre mm	Pellet Weight g	Pellet Length mm	Single pack.	Sales pack.

SHOT-SHELLS

COATED COMPETITION SLUG BLACK 26 LOW RECOIL

The GECO COATED COMPETITION SLUG BLACK 26 offers active shotgun users the following advantages:

- Teflon-coated slug for virtually no lead deposits in the barrel
- Minimal air pollution with lead vapour
- Carefully selected powder load for outstanding reliability and low recoil
- Short casing for higher capacity in tubular magazines
- The high velocity of 450 m/sec (1475 fps) makes leading moving targets unnecessary
- Low recoil
- Practical box of 100 with carry strap

COATED COMPETITION SLUG RED 28 OPTIMIZED FOR SENSITIVE SEMI-AUTOS

The GECO COATED COMPETITION SLUG BLACK 28 offers active shotgun users the following advantages:

- Leaves almost no lead fouling in the barrel thanks to its Teflon-coated slug
- Absence of lead fumes leads to low air pollution
- Special powder charge for a safe use in sensitive semi-autos
- Shorter, transparent case allows for a higher capacity in tubular magazines
- The high velocity of 420 m/sec (1377 fps) makes leading moving targets unnecessary
- Practical 100-round pack with carry strap

Item No.	Type	Gauge	Shot weight in g	V _{2,5m}	Ctg/box
231 76 25	CCS BLACK 26	12 / 67.5	26	450 m/sec	100
241 02 47	CCS RED 28	12 / 67.5	28	420 m/sec	100

COATED COMPETITION BUCK SHOT

This buckshot shell has been specially developed for IPSC competitions featuring mandatory buckshot stages. It therefore has the following distinct properties:

- 9 pellets with an 8 mm diameter for an optimal hit rate
- Nickel-coated shot to avoid edge shot, even with narrow choke tubes.
- Very narrow burst thanks to short slots guiding the pellets in the shot cup
- Short case for higher capacity in tubular magazines
- Works reliably even in responsive semi-automatics
- Low recoil

DYNAMIC BIRD SHOT

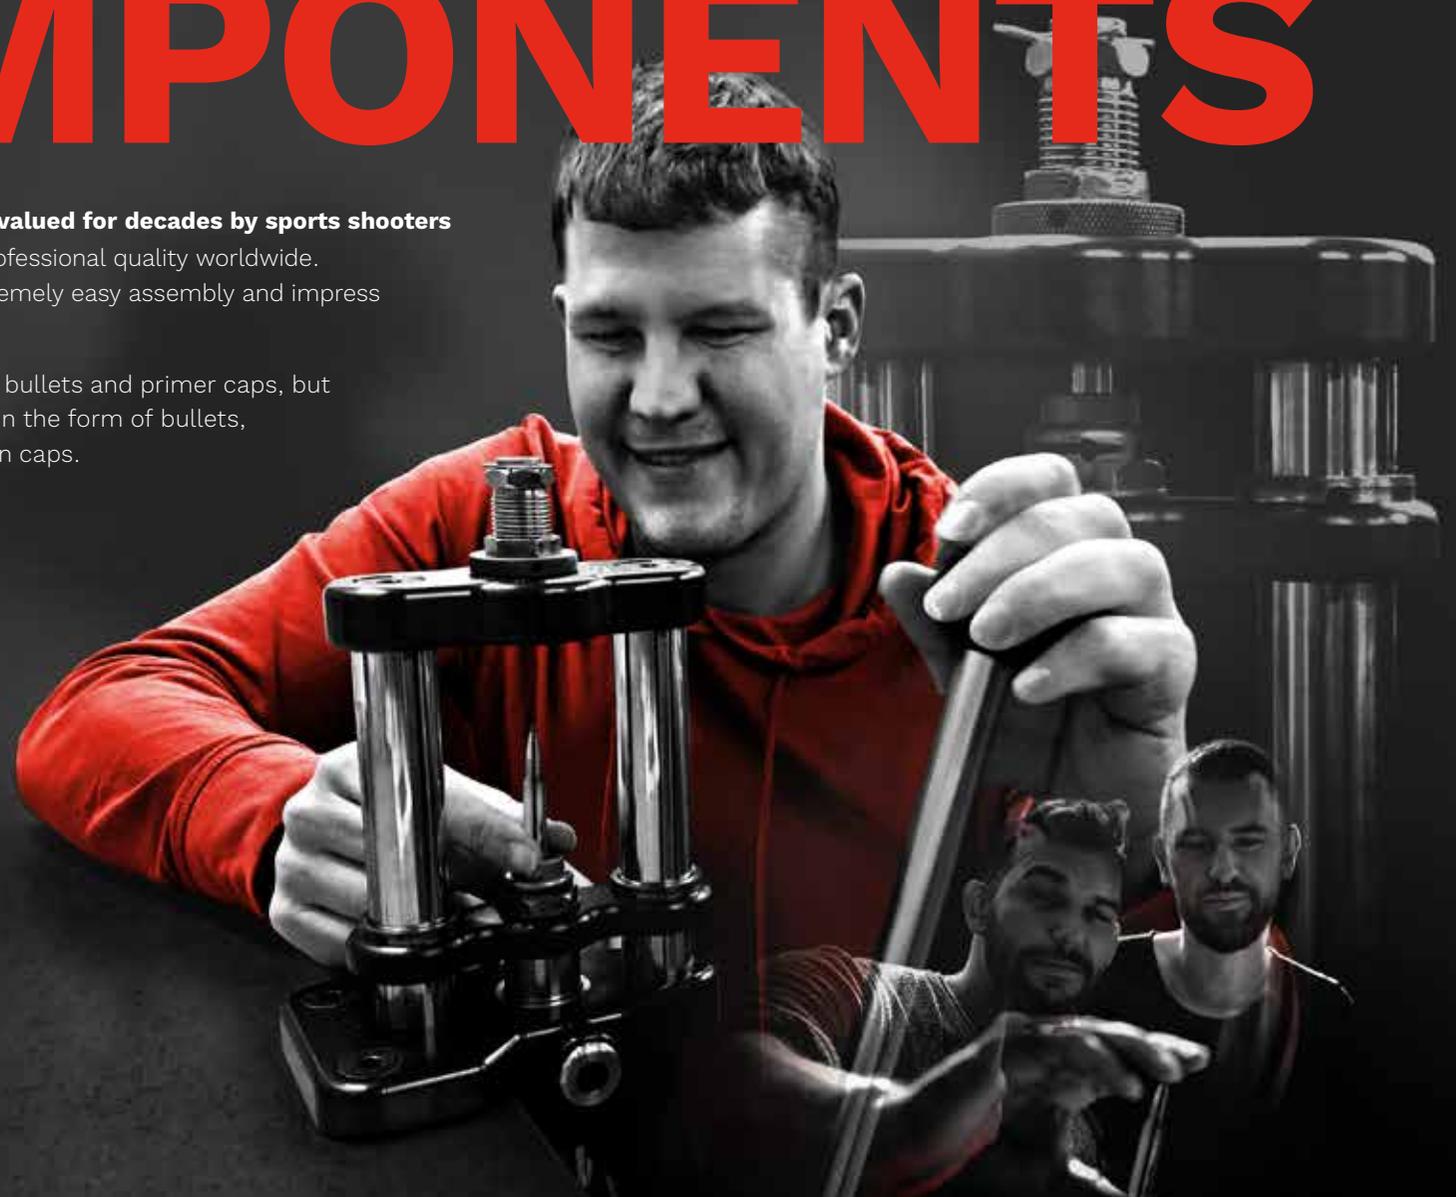

The area of application for these sport shot cartridges includes all dynamic shotgun shooting applications. Specially designed for IPSC disciplines and target shooting, this shell features the following properties:

- 2 versions – perfectly suited to different shooting distances
- Cover and pellet weight perfectly calibrated
- Very narrow burst thanks to short slots guiding the pellets in the shot cup
- Short case for higher capacity in tubular magazines
- Works reliably even in responsive semi-automatics
- Low recoil

Item No.	Type	Gauge	Shot weight in g	Shot sizes in mm	V _{2,5 m}	Ctg/box

240 02 34	DYNAMIC BIRD SHOT 31	12 / 65	31	2.9 mm	390 m/sec	25

COMPONENTS

A man in a red hoodie is focused on operating a reloading press. He is holding a die and a shell casing. In the background, two other men are visible, one of whom is also working with a reloading press. The scene is set in a dark environment, highlighting the man in the foreground.

GECO reloading components have been valued for decades by sports shooters and hunters and are synonymous with professional quality worldwide.

The high-tech components guarantee extremely easy assembly and impress with their optimised sensitivity.

GECO's portfolio includes rifle cartridges, bullets and primer caps, but also encompasses handgun ammunition in the form of bullets, cases as well as the respective percussion caps.

BOXER PRIMERS

GECO reloading components have been valued for decades by sport shooters and hunters and are synonymous with professional quality worldwide.

OPTICS

FOR A BETTER PERSPECTIVE

As far back as the 1930s, Gustav Genschow & Co. (GECO) sold binoculars under the GECO brand. Building on this tradition, GECO now offers riflescopes, red dot sights and binoculars of the highest optical and mechanical quality at a uniquely fair price.

Focused on and designed for the fundamental demands of hunters, marksmen and nature enthusiasts, these products have a universal range of use and are true to the motto: „Where Excitement Starts“.

RIFLE- SCOPES

The line of GECO riflescopes includes a model for practically every conceivable situation: From stalking to hunting from a high seat to driven hunts, from daytime to dusk and even night-time hunting, but also for long range shots and sport shooting.

RIFLESCOPES

BEST QUALITY AT A FAIR PRICE

The range includes riflescopes with 4x and 5x zoom, and leaves nothing to be desired.

- Illuminated fibre optic reticle
- Tool-free zeroing of the turrets

The 4x zoom riflescopes have a central tube diameter of 30 mm and stand out due to their optical performance specs for transmission, field of view and exit pupil. With the 3-12x56 and the 6-24x50, the range includes two absolute classics with outstanding performance specs for this price class.

The 5x zoom riflescopes with a central tube diameter of 30 mm stand out with their optimised zoom factor and thus increased flexibility and versatility without sacrificing their high optical performance.

NEW 1.7-9x44i

With a magnification range of 1.7-9x, the new GECO rifle scope is the ideal choice for a wide range of use cases, from high seat to driven hunts. It boasts a 44 mm lens diameter which is well suited to hunts that continue through to dusk, and which remains easy to handle when used in combination with night-vision equipment.

1-5x24i

The perfect companion during driven hunts. Its large field of view improves safety and ensures that the shooter always has a comprehensive overview. The 5x zoom enables fast shooting even at long distances.

3-12x56/56i

The classic all-rounder for high seat and night-time hunting. Its 56 mm diameter lens, high transmission, and illuminated reticle offer increased reliability, even in extremely unfavourable lighting.

3,5-18x56i

With its large lens diameter and illuminated reticle, this rifle scope ensures you are always ready to take shots at short or long range even in extremely unfavourable light conditions. The focus here is on its flexibility and high optical performance.

RIFLESCOPES

RED DOT SIGHT

FOR DRIVEN HUNT AND DYNAMIC SPORT SHOOTING

At present, GECO reflex sights are available in two different designs: **Red Dot R20-2.0 and Open Red Dot Sight.**

Unlike riflescopes, reflex sights offer no or only minimal magnification.

But they are parallax-free. Shooters can also use both eyes to acquire the target. Reflex sights by GECO are built for hunting and sport shooting.

Item No.	Product	Reticle	Field of view at 100 m	Central tube Ø	Overall length	Weight approx.
231 92 19	RED DOT R20-2.0	2 MOA Dot	100 m	22 mm	62 mm	130 g
240 71 55	OPEN RED DOT SIGHT	2 MOA	100 m	19x23 mm	46 mm	30 g

PLS. SEE PAGE 55

RED DOT R20 – 2.0

The ideal companion for driven hunts over difficult terrain. The finely dimmable illuminated dot with a diameter of 2 MOA facilitates quick, intuitive and reliable target acquisition in every situation. The built-in weaver mount means the GECO Red Dot can be attached quickly and easily.

OPEN RED DOT SIGHT

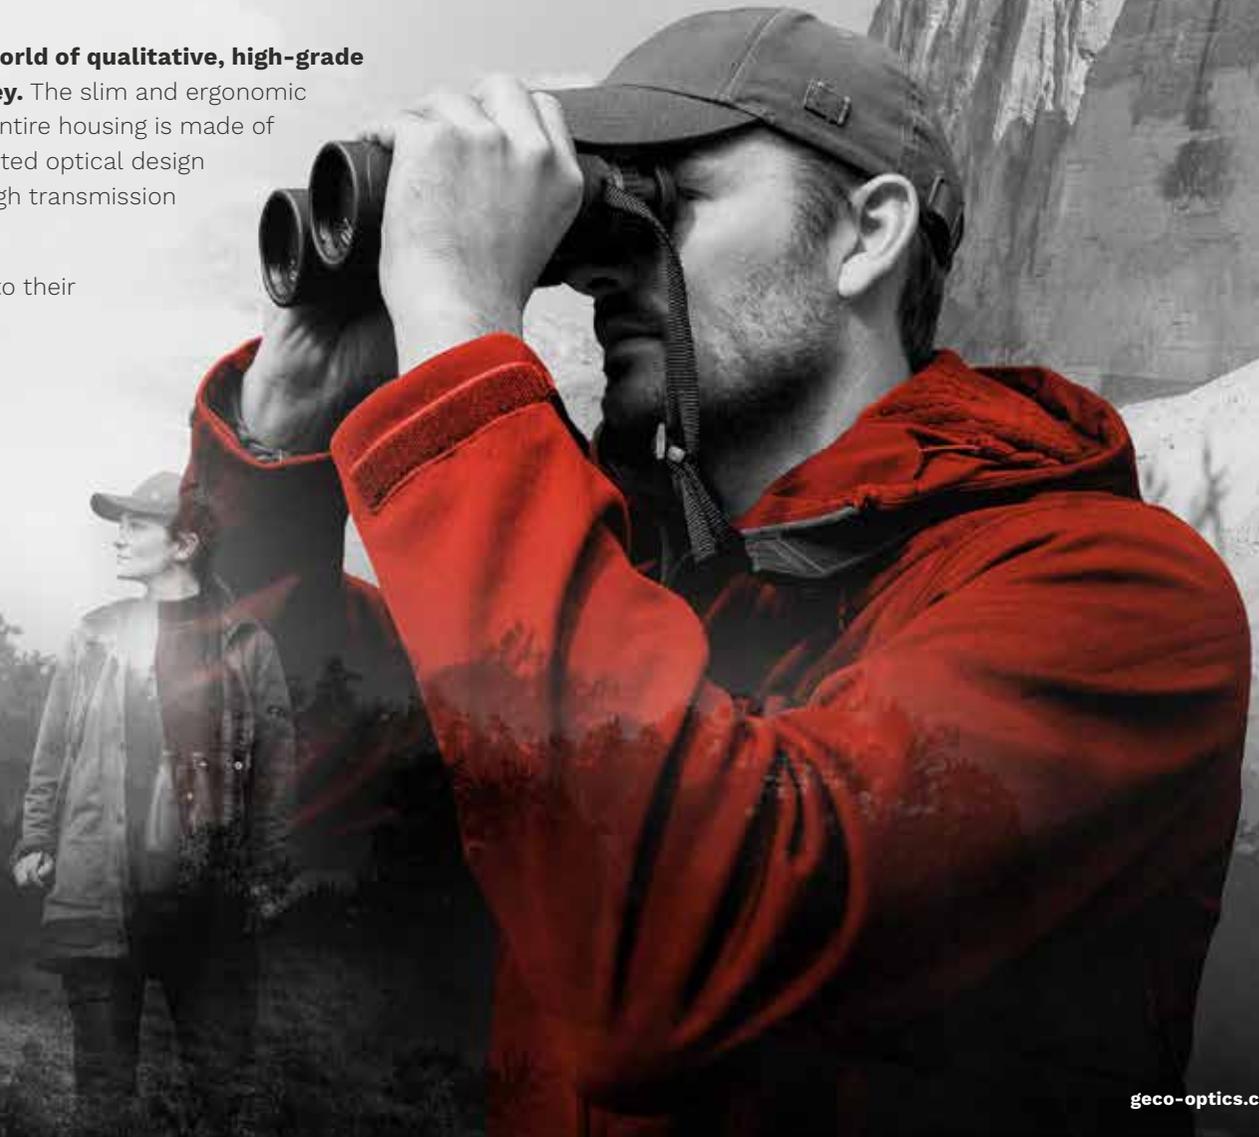

The new GECO Open Red Dot Sight is exceptionally compact, lightweight and at the same extremely robust. With its open field of view, it is the optimal companion on driven hunts for targets at short and medium distances with intuitive target acquisition. The fine 2 MOA dot is adjustable to six brightness levels. The specially coated and scratch-resistance glass lens prevents reflections. Replacing batteries is exceedingly user-friendly and can be done on the side compartment even when mounted, using commercially available mounting adapters on all bases.

CAUTION: Not suitable for use on handguns!

BINOCULARS

GECO binoculars offer the perfect entry into the world of qualitative, high-grade observation optics with unbeatable value for money. The slim and ergonomic design is combined with high-quality materials. The entire housing is made of magnesium. ED glass, multilayer coating and an adjusted optical design allow for large fields of view, sharp edge definition, high transmission values and great close focus.

These models stand out from their competitors due to their robustness, light weight and optical performance.

BINOCULAR RF

The GECO RF is remarkable not just because of its outstanding optics, but also because of its reliable and precise range-finding with rock-solid ballistics. The magnesium casing and the high-quality aluminum eye cups make the binoculars very robust, and as such the ideal companion for nature-lovers. Top-of-the-range optics combined with cutting-edge laser technology at an attractive price.

PLS. SEE PAGE 55

Item no.	Product	Colour	Exit pupil	Field of view at 1000 m	Close focus	Overall length	Width approx.	Measuring range	Weight approx.
241 42 61	10x50 RF	green	5	110 m	3	160 mm	130 mm	10 m - 1.600 m	1.000 g

10x50 RF

The GECO 10x50 RF pairs a magnesium housing with a robust and shock-absorbing rubber armor so that it can offer an optimal protection for sensitive optical and electronic elements as well as moving parts.

With the use of high-quality HD optics in combination with cutting-edge multiple lens coatings, top performance in

light transmission, field of view, edge sharpness and color fidelity are achieved. The distance to all objects from 10 to 1600 meters away can be simply and reliably determined at the touch of a button. In addition, the GECO RF can measure both angle of elevation (and corrected distance using the integrated ballistics calculator) and temperature.

The GECO 10x50RF comes with a carrying strap and a hard case.

OPTICS

PLS. SEE PAGE 55

fig. 8x32

**8x32/
10x32**

The perfect companion for virtually every observation scenario. Extreme compactness and low weight make for optimum handling. Their optics deliver razor-sharp images in good ambient light.

fig. 10x42

**8x42/
10x42**

Due to a wide field of view, they offer an excellent overall view coupled with a steady image. A greater lens diameter, ED glass and GECObright multi-layer coating create sufficient light reserves for use into advanced twilight.

fig. 8x56

**8x56/
10x56**

Both powerful and effective. The compact and lightweight design combined with the very large fields of view and the large exit pupil make spotting a relaxed activity. The high transmission values create bright and high-contrast images for hunting until nearly nightfall.
